Our Livable World-Marc Schaus 2020-10-13 A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In Our Livable World, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, “smart highways” designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides,

bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cliff action thrillers, real solutions are being developed, right this moment. Our *Livable World* features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. “An important book that shows the dawn of a new kind of environmental movement—an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us.” —Katie Patrick, author of *How to Save the World*

Motorized Obsessions-Paul R. Josephson 2007-08-22 From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

The Strenuous Life-Ryan Swanson 2019-08-20 “It seemed as if Theodore Roosevelt's biographers had closed the book on his life story. But Ryan Swanson has uncovered an untold chapter” (Johnny Smith, coauthor of *Blood Brothers: The Fatal Friendship between Muhammad Ali and Malcolm X*). Crippling asthma, a frail build, and grossly myopic eyesight: these were the ailments that plagued Teddy Roosevelt as a child. In adulthood, he was diagnosed with a potentially fatal heart condition and was told never to exert himself again. Roosevelt's body was his weakness, the one hill he could never fully conquer—and as a result he developed what would become a lifelong obsession with athletics that he carried with him into his presidency. As President of the United States, Roosevelt boxed, practiced Ju-Jitsu, played tennis nearly every day, and frequently invited athletes and teams to the White House. It was during his administration that America saw baseball's first ever World Series; interscholastic sports began; and schools began to place an emphasis on physical

education. In addition, the NCAA formed, and the United States hosted the Olympic Games for the first time. From a prize-winning historian, this book shows how Roosevelt fought desperately (and sometimes successfully) to shape American athletics in accordance with his imperialistic view of the world. It reveals that, in one way or another, we can trace our fanaticism for fitness and sports directly back to the twenty-sixth president and his relentless pursuit of "The Strenuous Life." "Essential reading for anyone who cares about the history of sports in America." —Michael Kazin, author of *War against War: The American Fight for Peace, 1914-1918*

Orthogeriatrics-Paolo Falaschi 2016-09-19 This book focuses on orthogeriatrics, a topic that has received little attention in the literature to date. As active members of the Fragility Fracture Network (FFN), the editors and most of the authors of this book have gathered all essential expertise on hip fracture management in a single volume. The 14 chapters provide a complete overview of how to approach fractures in elderly patients, starting with the epidemiology of hip fractures and subsequently addressing osteoporosis, surgery, anesthesia, medical management of frailty, and peri-operative complications. Attention is also given to rehabilitation and nursing, as well as to the psychological evaluation of the patient and the caregivers, thus emphasizing the importance of a multidisciplinary approach. Thanks to its clinical and practice-oriented nature, the book will especially be of interest to residents and young geriatricians, as well as orthopaedic surgeons, anesthesiologists and nurses dealing with elderly fracture patients in all parts of the world.

Perfect proposal, perfect engagement, perfect wedding, perfect honeymoon, and perfect newlywed years. Greg Behrendt and Amiira Ruotola stumbled right out of the wedding gate. Their choices in the early years, they'll tell you, nearly bought their marriage a one-way ticket to Suckville. The New York Times bestselling authors explore all the adventures of early wedlock, from the moment one of you gets on one knee to the day when sex starts to feel like work instead of play. In this guidebook, Behrendt and Ruotola explore their own marriage and, with gleeful candor, tremendous warmth, sharp humor, and piercing insight, look at what we who have decided to "settle down" hope to get out of our most lasting relationship. We venture through volumes on the engagement, wedding planning, the Big Day, the wedding hangover, the (blissful?) first year, the hard work of marrying two lives, fights, and sex-pectations versus sex-pectreality. The perfect book for those who have just put a ring on it or are thinking of putting a ring on it, Behrendt and Ruotola's work is a brilliant guide for the first stretch of that wild ride we call marriage.
