A History of Independent Television in Wales-Jamie Medhurst 2015-02-20 Despite the growing body of work on the media in Wales, very little exists on the history of commercial television in Wales. This book seeks to address this imbalance by tracing the growth and development of ITV in Wales and assessing its contribution to the life of the nation. ITV has been a powerful force in British broadcasting since its inception in 1955. When commercial television came to Wales for the first time in 1958, it immediately got caught up in with matters of national identity, language and geography. Compared with the BBC, it is a relative newcomer; its growth was slower than that of the BBC and it took until 1962 to complete the network across the UK. Once it had arrived, however, its impact was considerable. The book will provide an historical narrative and critical analysis of independent television (ITV) in Wales from 1958 up until the present day.

The 5th edition has been updated to enhance student understanding of the role of accounting theory and the application of accounting theory in the professional environment. Increasingly, students have failed to appreciate the relevance of studying accounting theory due to the esoteric nature of the discipline and its lack of any obvious correlation to a discrete accounting process. The new edition addresses this issue and makes the link to industry more clear through chapter vignettes and case studies. The new edition goes further to align the study of accounting theory to the professional environment domestically and internationally. To achieve this, the new edition includes a "International View" vignette in each chapter to profile the international response or thinking on relevant issues, ?Theory in Action? boxes illustrate the chapter material by way of presenting professional examples to build understanding and end of chapter case studies have develop and apply student understanding of the material.
