

Sharp Ar Rp7 Service Manual

An Ecosystem Services Approach to Assessing the Impacts of the Deepwater Horizon Oil Spill in the Gulf of Mexico-National Research Council 2013-12-20 As the Gulf of Mexico recovers from the Deepwater Horizon oil spill, natural resource managers face the challenge of understanding the impacts of the spill and setting priorities for restoration work. The full value of losses resulting from the spill cannot be captured, however, without consideration of changes in ecosystem services--the benefits delivered to society through natural processes. An Ecosystem Services Approach to Assessing the Impacts of the Deepwater Horizon Oil Spill in the Gulf of Mexico discusses the benefits and challenges associated with using an ecosystem services approach to damage assessment, describing potential impacts of response technologies, exploring the role of resilience, and offering suggestions for areas of future research. This report illustrates how this approach might be applied to coastal wetlands, fisheries, marine mammals, and the deep sea -- each of which provide key ecosystem services in the Gulf -- and identifies substantial differences among these case studies. The report also discusses the suite of technologies used in the spill response, including burning, skimming, and chemical dispersants, and their possible long-term impacts on ecosystem services.

Applications and Challenges of Geospatial Technology-Pavan Kumar 2018-11-24 This book advances the scientific understanding and application of space-based technologies to address a variety of areas related to sustainable development; including environmental systems analysis, environmental management, clean processes, green chemistry, and green engineering. Geo-spatial techniques have gained considerable interest in recent decades among the earth and environmental science communities for solving and understanding various complex problems and approaches towards sustainable technologies. The book encompasses several scopes of interests on sustainable technologies in areas such as water resources, forestry, remote sensing, meteorology, atmospheric and oceanic modeling, environmental engineering and management, civil engineering, air and environmental pollution, water quality problems, etc. The book will appeal to people with an interest in geo-spatial techniques, sustainable development and other diverse backgrounds within earth and environmental sciences field.

User Modeling 2007-Cristina Conati 2007-08-28 This book constitutes the refereed proceedings of the 11th International Conference on User Modeling, UM 2007, held in Corfu, Greece in July 2007. Coverage includes evaluating user/student modeling techniques, data mining and machine learning for user modeling, user adaptation and usability, modeling affect and meta-cognition, as well as intelligent information retrieval, information filtering and content personalization.

Chinese Big Business in Indonesia-Christian Chua 2008-03-25 The disintegration of Indonesia's New Order regime in 1998 and the fall of Soeharto put an end to the crude forms of centralised authoritarianism and economic protectionism that allowed large Chinese conglomerates to dom- inate Indonesia's private sector. Contrary to all expectations, most of the major capitalist groups, though damaged considerably by the Asian Crisis, managed to cope with the ensuing monumental political and economic changes, and now thrive again albeit within a new democratic environment. In this book Christian Chua assesses the state of capital before, during, and after the financial and political crisis of 1997/1998 and analyses the changing relationships between business and the state in Indonesia. Using a distinct perspective that combines cultural and structural approaches on Chinese big business with exclusive material derived from interviews with some of Indonesia's major business leaders, Chua identifies the strategies employed by tycoons to adapt their corporations to the post-authoritarian regime and provides a unique insight into how state-business relationships in Indonesia have evolved since the crisis. Chinese Big Business in Indonesia is the first major analysis of capital in Indonesia since the fall of Soeharto, and will be of interest to graduate students and scholars of political economy, political sociology, economics and business administration as well as to practitioners having to do with Southeast Asian business and politics.

A Plain Introduction to the Criticism of the New Testament, 2 Volumes-Frederick H. Scrivener 1997-11-12 Scrivener was a master of textual criticism. This fourth edition, completed by Edward Miller, records 3,791 manuscripts. A classic, essential for understanding the history of textual criticism.

New Insights Into Retinal Degenerative Diseases-Robert E. Anderson 2001-12-31 Since 1984, we have organized satellite symposia on retinal degenerations that are held in conjunction with the biennial International Congress of Eye Research. The timing and location of our Retinal Degeneration Symposia have allowed scientists and clinicians from around the world to convene and present their exciting new findings. The symposia have been arranged to allow ample time for discussions and one-on-one interactions in a relaxed atmosphere, where international friendships and collaborations could be established. The IXth International Symposium on Retinal Degeneration was held on October 9-14, 2000 in Durango, Colorado and was attended by over 100 scientists from six continents. This book contains many of their presentations. Several events of note occurred at this meeting. First, thanks to the generous support of the Foundation Fighting Blindness, we were able to sponsor the travel of 11 young scientists from six countries. Most of them have contributed chapters to this volume. The response to the travel program was so overwhelming that we will make it regular feature of our meeting. This will allow other bright, young investigators to be introduced to the world experts who study retinal degenerations. Second, about 40% of the scientists who attended this meeting were there for the first time. We believe that this indicates a growing interest in retinal degeneration research and ensures that new talent will be attracted to this important area of investigation. The symposium received support from several organizations.

The Complex Lives of British Freshwater Fishes-Mark Everard 2020-05-27 This stunningly illustrated book goes far beyond a run-of-the-mill nature guide. It explores the fascinating life histories of Britain's freshwater fishes, a group of animals which, despite their importance and ubiquity in our diverse still and flowing fresh waters, has before now been rarely regarded and respected as 'wildlife'. Our native fishes tend generally to be considered as simply something for anglers to catch or for people to eat, yet they work enormously hard for us. Author Mark Everard, avid nature-watcher, angler and scientist, shows how freshwater fish provide food, ornamentation, sport and cultural identity, and highlights their huge importance for conservation as part of the living ecosystems upon which we all depend. He dives into the mysteries moving below the surface of our rivers and lakes, bringing the wonderful and fascinating world of the diversity of British freshwater fish species into plain sight and into mind. This unique book features over 100 full-colour photographs by pioneering photographer and filmmaker Jack Perks, whose work has featured on BBC Springwatch, The One Show and Countryfile. The book is filled with technical detail useful to conservationists and biology students. Most importantly, it is also presented in an accessible, visually attractive and engaging manner that will appeal to anybody with an interest in the natural world: the conservation-minded public, the angling community, and our nation of wildlife enthusiasts. Whatever your background, this book will open your eyes to our freshwater fishy wealth, and the many ways in which it enriches our lives.

Fly Ash Zeolites-Bhagwanjee Jha 2016-05-27 This book presents a thorough review of the state-of-knowledge and recent innovations in the synthesis of pure and improved grades of fly ash zeolites (FAZ). Addressing improvements to conventional methods, it also showcases a novel technique for the synthesis of high cation exchangers from fly ash and detailed characterization techniques for the products obtained. In addition, it examines in detail various areas of specific applications of fly ash zeolites. Over the years, several methods such as hydrothermal, fusion prior to hydrothermal, microwave assisted hydrothermal and molten salt techniques for producing FAZ have been developed. However, one-step and two-step reactions between the fly ash and alkali usually generate alkaline wastes that may cause environmental contamination. In addition, the separation of FAZ from the partially activated fly ash (the impurities) remains a major concern for researchers and industrialists alike. /divin view of these challenges, this book presents a novel technique for three-step activation (TSA), which focuses on recycling the fly ash-NaOH-water reaction by-products until zeolitic residue is formed. The FAZ (the final residue after third step reactions) synthesized in this manner exhibits exceptionally high cation exchange capacity, specific surface area and pore area. This book offers a comprehensive compendium of reading material on fly ash and its recycled product, the zeolites. Students at both undergraduate and graduate levels, researchers, and practicing engineers will all find this book to be a valuable guide in their respective fields.

Clusters, Digital Transformation and Regional Development in Germany-Marta Götz 2021-04-12 The information age is reshaping current socio-economic structures and processes and this book touches upon the nature of clusters in the fourth industrial revolution (Industry 4.0; I4.0). It focuses on the spatial perspective of digital business transformation and explores in natural context the interrelations between cluster and I4.0. It investigates the role of knowledge, business relations and policy in making cluster relevant for Industry 4.0 and uses the case study method and literature review to develop a conceptual framework outlining the functioning of Industry 4.0 cluster. This book argues that locally embedded knowledge accompanied by strong presence of industry and assisted by proper governance management facilitate the implementation of I4.0. The idiosyncrasies of Industry 4.0 impact also the functioning of cluster as they require more interdisciplinary integrative approach with the provision of industrial commons and development of related varieties. Natural processes of stretching of the cluster cannot be prevented, but should be harnessed for upgrading the core competences of cluster. This book can enrich existing literature on economic geography and regional studies by discussing the spatial aspects of digital transformation. It shows the cluster transformation as induced by the digital transformation, and will be of interest to researchers, academics, policymakers, and students who explore the regional and local development, competitiveness, or managerial aspects of fourth industrial revolution.

Retinal Degeneration-Robert E. Anderson 2012-12-06 During the last few years, an explosion of infonnation has come from human genetics and molecular and cell biological studies as to the genetic basis for a number of fonn of inherited retinal degenerations. These disorders have plagued mankind for millennia because they take from otherwise healthy individuals the precious gift of sight. The fundamental advances in recent years have identified a number of genes involved in the groups of diseases which hopefully will lead to discoveries that may, in the not too distant future, allow the prevention and possible cure of some of these blinding eye disorders. To foster a forum for discussions of studies on degenerative retinal disorders, we convened a symposium on retinal degenerations in 1984, at the Vth International Congress of Eye Research Meeting, held in Alicante, Spain. Because of the success of this meeting and the subsequent publication, we have since organized a series of biennial satellite meetings on retinal degenerations for the ISER congresses held in Nagoya, Japan (1986), San Francisco (1988) and Helsinki (1990). Each of these satellite symposium on retinal degenerations was accompanied by a published proceedings volume. This volume is the fifth in this series and contains the proceedings of the Sardinia Symposium on Retinal Degeneration held September 15-20, 1992, as a satellite meeting of the 10th International Congress of Eye Research.

Intermediate Accounting-Donald E. Kieso 2017-12-22 Intermediate Accounting: IFRS Edition provides the tools global accounting students need to understand IFRS and how it is applied in practice. The emphasis on fair value, the proper accounting for financial instruments, and the new developments related to leasing, revenue recognition, and financial statement presentation are examined in light of current practice. Global Accounting Insights highlight the important differences that remain between IFRS and U.S. GAAP, and discuss the ongoing joint convergence efforts to resolve them. Comprehensive, up-to-date, and accurate, Intermediate Accounting: IFRS Edition includes proven pedagogical tools, designed to help students learn more effectively and to answer the changing needs of this course.

Diagnosing Maize Diseases in Latin America-Carlos Roberto Casela 1998

Microbial Diversity and Biotechnology in Food Security-R.N. Kharwar 2014-06-11 The roles of microbes in agriculture, industry and environment have been the point of interest since long time for their potential exploitation. Although only a fraction of microbial diversity was accessed by microbiologists earlier for harnessing them owing to limited techniques available. The molecular techniques have opened new vistas to access the wide field of the unexplored microbes and their exploitation for useful genes and novel metabolites. Sincere efforts have been made in biotechnology using microbes leading to improve our life with respect to agriculture and people health. This comprehensive volume covers different aspects of microbial biotechnology and its management in sustainable agriculture for food security and improved human health. The book comprises four sections: Endophytes and Mycorrhizae, Microbial Diversity and Plant Protection, Microbial Functions and Biotechnology, and Microbes and the Environment, which contain 53 chapters. The book examines the aspects on endophytes and mycorrhizae, bioactive compounds, growth promoting microorganisms, disease management with emphasis on biocontrol, genetics of disease resistance, microbial enzymes, advances in potential of microbes and their industrial as well as pharmaceutical applications. In addition, the use of botanicals, and the etiology and management of medicinal and aromatic plants in the post harvest management have been reviewed in greater depth for the benefit of teaching and research community. The biotechnological developments using microbe potential have enabled us combat the environment and human health problems worldwide in ecofriendly manner. We are sure that this volume will be highly useful to all those concerned with fungi, bacteria, viruses and their biology, including environmental and public health officers and professionals in the field of interest. The volume is an exhaustive coverage of almost all the aspects of microbial biology and biotechnology.

Railway Management and Engineering-V Profillidis 2017-11-30 In a rapidly changing world, with increasing competition in all sectors of transportation, railways are in a period of restructuring their management and technology. New methods of organization are introduced, commercial and tariff policies change radically, a more entrepreneurial spirit is required. At the same time, new high-speed tracks are being constructed and old tracks are renewed, high-comfort rolling stock vehicles are being introduced, logistics and combined transport are being developed. Awareness of environmental issues and search for greater safety give to the railways a new role within the transportation system. Meanwhile, methods of analysis have significantly evolved, principally due to computer applications and new ways of thinking and approaching old problems. Therefore it becomes necessary to come up with a new scientific approach to tackle management and engineering aspects of railways, to understand in-depth the origins and inter-relationships of the various situations and phenomena and to suggest the appropriate methods and solutions to solve the various emerging problems. This book aims to cover the need for a new scientific approach for railways. It is written for railway managers, economists and engineers, consulting economists and engineers, students of schools of engineering, transportation and management. The book is divided into three distinct parts: Part A deals with the management of railways, Part B deals with the track and, Part C deals with rolling stock and environmental topics. Each chapter of the book contains the necessary theoretical analysis of the phenomena studied, the recommended solutions, applications, charts and design of the specific railway component. In this way, both the requirement for a theoretical analysis is met, and the need of the railway manager and engineer for tables, nomographs, regulations, etc. is satisfied. Railways in Europe have separated activities of infrastructure from those of operation. In other parts of the world, however, railways remain unified. The book addresses both situation. Railways present great differences in their technologies. Something may be valid for one such technology, but not for another. To overcome this problem, regulations of the International Union of Railways (UIC) as well as European Standardization (CEN) have been used to the greatest extent possible. Whenever a specific technology or method is presented, the limits of its application are clearly emphasized.

The Philosophy of GIS-Timothy Tambassi 2019-06-04 This anthology aims to present the fundamental philosophical issues and tools required by the reflection within and upon geography and Geographic Information Systems (GIS) . It is an introduction to the philosophy for GIScience from an analytical perspective, which looks at GIS with a specific focus on its fundamental and most general concepts and distinctions. The first part of the book is devoted to explore some of the main philosophical questions arising from GIS and GIScience, which include, among others, investigations in ontology, epistemology, linguistics and geometrical modeling. The second part concerns issues related to spatial and cartographical representations of the geographical world. The third part is focused on the ontology of geography, specifically in terms of geographical entities, objects and boundaries. Finally, in the fourth part, the topic of GIS constitutes a starting point for exploring themes such as quantum geography and disorientation, and for defining professional profiles for geographers with competences in GIS environment. This book on a new and unexplored field of research could be a fundamental point of reference for professional philosophers and geographers interested in the theoretical reflection about the foundational concepts of GIScience. It is also interesting reading material for students (both undergraduates, postgraduates and Ph.D. students) in philosophy, geography, applied ontology, GIScience, geomatics and computer science.

East Asia -1998-01-01 East Asia: The Road to Recovery carefully analyzes the events that led to the current economic crisis in East Asia, the tremendous effects the crisis has had on the Asian economies, and prospects for the region's future. Chapters in the book cover the region's trade and competitiveness; the financial sector at the center of the crisis; the corporate sector's financial performance and governance; the social crisis resulting from the financial crash; protection of the environment as well as the people; and policies for sustainable recovery. This book not only discusses how this catastrophe could ever have taken place, but more importantly, what can be done to ensure that it won't happen again.

Intermediate Accounting-Donald E Kieso, Ph.D., CPA 2004-06-01 Intermediate Accounting by Kieso, Weygandt, and Warfield is, quite simply, the standard by which all other intermediate texts are measured. Throughout the thirty years, and ten best-selling editions, the text has built a reputation for accuracy, comprehensiveness, and student success. This Updated Edition features and incorporates the 2005 FASB key accounting standards that have been updated since the original publication of "Intermediate Accounting, 11th Edition." The Updated Eleventh Edition maintains the qualities for which the text is globally recognized, and continues to be your students' gateway to the profession! Included in the package is the "Problem-Solving Survival Guide."

Retronics-Jan Buiting 2013-04-01

A Concise Dictionary of Greek and Roman Antiquities-Francis Warre Cornish 1898

Commercial Vehicle Technology 2018-Karsten Berns 2018-05-03 Die Beiträge der Commercial Vehicle Technology 2018 sind eine Sammlung von Publikationen für das 5. CVT Symposium der TU Kaiserslautern. Wie in den Jahren zuvor, 2010, 2012, 2014 und 2016 wurden zahlreiche Beiträge zu aktuellen Entwicklungen im Nutzfahrzeugbereich zu einer interessanten und informativen Sammlung zusammengestellt. Die Beiträge sind für Maschinenbauer, Elektrotechniker und Informatiker aus Industrie und Wissenschaft von Interesse und zeigen den aktuellen Stand der Technik auf diesem Gebiet. Die Inhalte der Publikationen umfassen die Themen unterstütztes und automatisiertes Fahren und Arbeiten, Energie- und Ressourceneffizienz, innovative Entwicklung und Fertigung, Sicherheit, Zuverlässigkeit und Langlebigkeit sowie Systemsimulation. Die Konferenz findet vom 13. bis 15. März 2018 an der Technischen Universität Kaiserslautern statt und erwartet den Besuch vieler renommierter Wissenschaftler und Vertreter der Industrie. The proceedings of Commercial Vehicle Technology 2018 are a collection of publications for the 5th CVT Symposium at the University of Kaiserslautern. As in the previous years 2010, 2012, 2014 and 2016 numerous submissions focusing on current developments in the field of commercial vehicles have been composed into an interesting and informative collection. The contributions are of interest for mechanical engineers, electrical engineers and computer scientists working in industry and academia and show the current state-of-the-art in this field. The contents of the publications span the topics assisted and automated driving and working, energy and resource efficiency, innovative development and manufacturing, safety, reliability and durability as well as system simulation. The conference is held on March 13 to 15, 2018 at the Technische Universität Kaiserslautern and is expecting the attendance of many renowned scientists and representatives of industry.

Diversity in Unity-Amarina A. Ariyanto 2018 Psychology; Behavioral science; Perspectives

Retinal Degeneration-Bernhard Weber 2012-11-13 Over the past decades, knowledge about the cellular and molecular basis underlying the visual process has remarkably increased. In Retinal Degeneration: Methods and Protocols, expert researchers in the field provide a guide of relevant and state-of-the-art methods for studying retinal homeostasis and disease. These include methods and techniques for addressing cell culture systems and animal models of disease, their generation, their phenotypic and molecular characterization as well as their use in therapeutic

approaches to the retina. Written in the highly successful Methods in Molecular Biology™ series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and key tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, *Retinal Degeneration: Methods and Protocols* aids scientists in continuing to study the cutting-edge techniques of retinal cell biology in health and disease.

Petroleum Well Construction-Michael J. Economides 1998-06-18 *Petroleum Well Construction* Michael J. Economides Texas A & M University Larry T. Watters Halliburton Energy Services Shari Dunn-Norman University of Missouri-Rolla Since the 1980s, well construction procedures have advanced so significantly that the subject now requires a comprehensive reference book dealing with all types of petroleum drilling and well completions. With each chapter co-authored by recognized industry professionals, this extensive work fills the void that currently exists in the technical reference publications of this subject. All technical aspects of petroleum well construction are covered, including: * drilling trajectory and control * multilateral wells * borehole stability * gas migration * perforating * inflow performance resulting in an essential reference tool for all petroleum, nuclear and environmental engineers and technicians.

Ludwig's Applied Process Design for Chemical and Petrochemical Plants-A. Kayode Coker, PhD 2014-11-29 The fourth edition of Ludwig's Applied Process Design for Chemical and Petrochemical Plants, Volume Three is a core reference for chemical, plant, and process engineers and provides an unrivalled reference on methods, process fundamentals, and supporting design data. New to this edition are expanded chapters on heat transfer plus additional chapters focused on the design of shell and tube heat exchangers, double pipe heat exchangers and air coolers. Heat tracer requirements for pipelines and heat loss from insulated pipelines are covered in this new edition, along with batch heating and cooling of process fluids, process integration, and industrial reactors. The book also looks at the troubleshooting of process equipment and corrosion and metallurgy. Assists engineers in rapidly analyzing problems and finding effective design methods and mechanical specifications Definitive guide to the selection and design of various equipment types, including heat exchanger sizing and compressor sizing, with established design codes Batch heating and cooling of process fluids supported by Excel programs

Acp Intermediate Algebra-Brooks/Cole 2014-06-20

The Open Economy-Rudiger Dornbusch 1988 This important book is a teaching manual, in nontechnical language, on policymaking in developing countries. Written at the request of the Economic Development Institute of the World Bank, the papers focus on policy instruments, their use and constraints, and provide case studies of economic policy in Argentina, Brazil, Indonesia, Korea, and Mexico to illustrate basic problems and possible solutions.

Evaluation of Signal/control System Equipment and Technology-United States. Federal Railroad Administration 1978

Dinosaur Tracks-Peter L. Falkingham 2016-08-15 The latest advances in dinosaur ichtology are showcased in this comprehensive and timely volume, in which leading researchers and research groups cover the most essential topics in the study of dinosaur tracks. Some assess and demonstrate state-of-the-art approaches and techniques, such as experimental ichtology, photogrammetry, biplanar X-rays, and a numerical scale for quantifying the quality of track preservation. The high diversity of these up-to-date studies underlines that dinosaur ichtological research is a vibrant field, that important discoveries are continuously made, and that new methods are being developed, applied, and refined. This indispensable volume unequivocally demonstrates that ichtology has an important contribution to make toward a better understanding of dinosaur paleobiology. Tracks and trackways are one of the best sources of evidence to understand and reconstruct the daily life of dinosaurs. They are windows on past lives, dynamic structures produced by living, breathing, moving animals now long extinct, and they are every bit as exciting and captivating as the skeletons of their makers.

.

A SECRET SORROW-Karen Van Der Zee 2015-04-13 After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job and confines herself in her family home. One day, she meets her brother's best friend , and her soul makes a first step to healing.

Maintenance of Airport Visual Aid Facilities-United States. Federal Aviation Administration 1982

Microbial Plant Pathogens-Detection and Disease Diagnosis:-P. Narayanasamy 2010-10-20 Microbial plant pathogens causing qualitative and quantitative losses in all crops are present not only in the infected plants, but also in the environment comprising of soil, water and air. The vectors present in the environment spread the microbial pathogens to short and/or long distances. Detection of microbial pathogens rapidly and reliably by employing suitable sensitive applicable for different ecosystems. The pathogens have to be identified precisely and differentiated and quantified to plan appropriate short- and long-term strategies to contain the incidence and spread of diseases induced by them. This book aims to present all relevant and latest information on the detection techniques based on the biological, biochemical, immunological and nucleic acid characteristics of microbial pathogens presents in the host plants, as well as in the natural substrates that support the survival and perpetuation of the pathogens.

Strategic Camouflage-Solomon Joseph Solomon 1920

PHP & MySQL: The Missing Manual-Brett McLaughlin 2012-11-13 If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.

Virgin Lands-L. I. Brezhnev 2014-05-19 *Virgin Lands: Two Years in Kazakhstan, 1954-5* focuses on the life, career, and experiences of L. I. Brezhnev when he stayed in Kazakhstan to push for the improvement of the agriculture sector of the country. The book first offers information on the experiences of L. I. Brezhnev as a farmer, land-use surveyor, metallurgist, factory worker, and politician. Brezhnev underscores how he pushed for the organization of collective farms. The text also highlights the poor state of agriculture in the country, including the farming methodologies that Brezhnev and his countrymen have adopted to overcome the extreme conditions of farming lands. The manuscript details the improvement of state farms, particularly noting the increase in harvest and the number of farms to be set up. Brezhnev narrates how the state farms are affected by drought and extreme weather conditions, and how they have doubled the crop areas through the use of farm implements. The book also underscores the role of farm machineries in the increase of production of grain, meat, and vegetables. The text is a dependable source of data for readers interested in the life and career of L. I. Brezhnev, particularly his dedication to develop agriculture in Kazakhstan.

Rural Financial Markets in Asia-Richard L. Meyer 2000 This book examines the commercialization of the rural Asian economy and the provision and use of rural financial services since the 1970s.

Household and Family Characteristics-

The Real Chimpanzee-Christophe Boesch 2009-07-23 *Chimpanzee Behavior* encapsulates the fascinating behaviour of wild chimps and discusses the differences observed in different populations across the species, and across the many levels of their social behaviour. It tells the story of why sex competition in a forest chimpanzee population made the females of the group highly social and gave the males a high level of within-group solidarity, making them very xenophobic towards outsiders. Christophe Boesch brings back to the table the debate over ecological pressures and social organization, and the influence they have over issues such as the evolution of warfare, co-operation, altruism and the position of females. Writing for undergraduate and graduate students, he presents insightful views to give readers the background information to understand the struggle for survival of our closest living relative, the chimpanzee, and through this find some keys to the ever-so-intriguing question of what makes us human.
