**Profits of Peace**-Scott Newton 1996-03-14 This bold new interpretation of Anglo-German appeasement challenges existing accounts, both orthodox and revisionist, by focusing on the economic motivations behind appeasement rather than on the workings of foreign policy. Scott Newton argues that appeasement stemmed from the determination of interwar administrations, particularly that of Neville Chamberlain, to protect the liberal-capitalist status quo established in the collapse of Lloyd George's attempts at reconstruction after 1918. Newton shows that the Government, aided and abetted by the Bank of England, the

City, and large-scale industry, maintained its search for detente well beyond the outbreak of war, up until Churchill became Prime Minister in May 1940. The author goes on to reveal that certain circles within the establishment loyal to the prewar order continued their efforts to reach agreement with Germany even after 1940. He argues that the Hess affair represented the appeasers' last throw: the subsequent entry of the USSR and the USA into the conflict guaranteed the impossibility of a separate Anglo-German settlement, and combined with war socialism at home to open the door to a new era characterized by the welfare state and the Anglo-American special relationship. This is the first major study to provide a thorough analysis of the domestic political and economic background to appeasement, and to explain fully the reasons behind the persistence of the appeasement lobby even beyond the outbreak of war.

**German Military Vehicles of World War II**-Jean-Denis G.G. Lepage 2014-11-18 This volume presents a cross-section of the most common transport vehicles produced and used by the German army. Tanks plus auxiliary vehicles such as cars, motorcycles, vans, ambulances, trucks and tractors made it possible for the troops to keep moving. These lightly armored or unarmored vehicles—aka “soft skins”—operated behind the front lines, maintaining supply lines, connecting armies with their home bases, and ultimately determining the outcome of battle. Beginning with the development of military vehicles in the early 1930s, this volume discusses the ways in which this new technology influenced and, to some extent, facilitated Hitler’s program of rearmament. Nomenclature, standard equipment, camouflage and the combat roles of the various vehicles are thoroughly examined. Individual vehicle types are arranged and discussed by the following classifications: cars and motorcycles; trucks and tractors; half-tracks and wheeled combat vehicles. Accompanied by well-researched, detailed line drawings, each section deals with a number of individual vehicles, describing their design, manufacture and specific use.

**Competitive Strategies for Service Organizations**-Neil Botten 1999 Business analysts are in agreement that our future economy, if not our present one, will be dominated by global business and a service economy. The existing literature, however, fails to explain the influence and application of the principles of strategic management in a global service economy. *Competitive Strategies for Service Organizations* fills that gap, providing an understanding of the major changes that will affect players in this economy. The picture this

book paints is a complex one: the economic model based on the availability of capital is being replaced by one relying on innovation and intellectual capital-the cornerstone of the service economy. Current management strategy theory and its practical application are to some degree out of sync with this emerging model. Drawing on international examples for their case-study material, Neil Botten and John McManus balance their exposition of theory with real-world examples organized around the emerging service model. The authors discuss strategy in all its practical dimensions: political, economic, social and technological. In pulling together existing models and techniques and showing, through case histories, how these frameworks may be used in service organizations, they provide valuable guidelines for the forward-looking leaders of our growing service economy.
